Answers to received questions

Q:
Is it the intent to meet the 85 dBA OSHA noise exposure limit at all firing points or to meet the shooting range industry standard of an RT60 of 1.5 seconds across all octaves from 125 Hz to 8000 Hz at all firing points in the range?
A:
It is the intent of the RFP to meet the shooting range industry standard of an RT60 of 1.5 seconds across all octaves from 125 Hz to 8000 Hz at all firing points in the range.

Q:
Are there drawings available for the existing range? Including a room layout to determine if range noise will have an impact on adjoining offices, classrooms?
A:
See Attached Figure. There are no adjacent rooms that have concerns regarding noise levels.

Q:
Do you have a local noise ordinance that must be met?
A:
No.

Q:
Could you provide pictures of the existing range to determine existing conditions?
A:
See Attached Photos.

Q:
Are there bid drawings available? And if so, how do I obtain those?
A:
Size of the firing range room is 19’ wide by 60’ long and 10’ to the metal ceiling. It is located in the basement of the older section of the station. See Attached photographs.
