SEVERE WEATHER AND NATURAL DISASTERS

Tornado:
• When a warning is issued by sirens or other means, seek inside shelter. Consider the following:
  - Small interior rooms on the lowest floor and without windows,
  - Hallways on the lowest floor away from doors and windows, and
  - Rooms constructed with reinforced concrete, brick, or block with no windows.
• Stay away from outside walls and windows.
• Use arms to protect head and neck.
• Remain sheltered until the tornado threat is announced to be over.

Earthquake:
• Stay calm and await instructions from the Emergency Coordinator or the designated official.
• Keep away from overhead fixtures, windows, filing cabinets, and electrical power.
• Assist people with disabilities in finding a safe place.
• Evacuate as instructed by the Emergency Coordinator and/or the designated official.

Flood:
If indoors:
• Be ready to evacuate as directed by the Emergency Coordinator and/or the designated official.
• Follow the recommended primary or secondary evacuation routes.

Hurricane:
• The nature of a hurricane provides for more warning than other natural and weather disasters. A hurricane watch issued when a hurricane becomes a threat to a coastal area. A hurricane warning is issued when hurricane winds of 74 mph or higher, or a combination of dangerously high water and rough seas, are expected in the area within 24 hours.

Once a hurricane watch has been issued:
• Await instructions from the Emergency Coordinator or the
designated official.
• Continue to monitor local TV and radio stations for instructions.
• Move early out of low-lying areas or from the coast, at the request of officials.
• If you are on high ground, away from the coast and plan to stay, secure the building, moving all loose items indoors and boarding up windows and openings.
• Collect drinking water in appropriate containers.

Once a hurricane warning has been issued:
• Be ready to evacuate as directed by the Emergency Coordinator and/or the designated official.
• Leave areas that might be affected by storm tide or stream flooding.

During a hurricane:
• Remain indoors and consider the following:
  - Small interior rooms on the lowest floor and without windows,
  - Hallways on the lowest floor away from doors and windows, and
  - Rooms constructed with reinforced concrete, brick, or block with no windows.

Blizzard:

If indoors:
• Stay calm and await instructions from the Emergency Coordinator or the designated official.
• Stay indoors!
• If there is no heat:
  - Close off unneeded rooms or areas.
  - Stuff towels or rags in cracks under doors.
  - Cover windows at night.
• Eat and drink. Food provides the body with energy and heat. Fluids prevent dehydration.
• Wear layers of loose-fitting, light-weight, warm clothing, if available.
