**Subject:** Loading Crude onto Boats to Clean Tanks?

Committee,

I grew up in South Portland and I live in South Portland.

I think the committee is doing a great job.

I was looking through some old Air Emission Licenses from PPLC and I was reminded of a complaint about the WPO and I was wondering if it was an actual concern or just something that people were saying.

Anti-WPO activists were saying that the WPO would prevent a company from emptying a crude petroleum storage tank onto a boat in order to clean the tank.

Is this a common practice? PPLC has at least 23 tanks in South Portland so they could just empty one tank into another to clean. I just wonder if that hypothetical complaint will come up again if the industry is looking for something to complain about in the new South Portland Clear Skies Ordinance.

Thanks!
