5/29/2019

Dear Property Owner/Resident,

The City of South Portland will soon begin work on the Greenbelt Trunkline Sewer Replacement project. This project involves the replacement of the existing sewer trunkline from the intersection of Mussey Street, down 3rd Street, onto the Greenbelt, and along the Greenbelt for 800 feet towards Broadway.

The purpose of the project is to reduce the size and frequency of combined sewer overflow (CSO) events, and is a requirement of the City’s stormwater permit.

City Council approved award of the contract to Grondin Corporation on Tuesday, May 14th. Grondin Corporation is expected to begin work on June 10th and continue through August 2019. The City is working proactively with the contractor to minimize inconvenience to residents during construction. The contractor’s working hours will typically be 7:00 am to 7:00 pm, Monday through Friday, with limited exceptions.

The project will require closure of the Greenbelt between Mussey Street and Broadway. Additionally, there may be periodic closures of portions of 3rd Street and at the intersection of Mussey and 3rd.

Questions or concerns related to the project can be directed to the following individuals:

Justin Gove, P.E.
Civil/Transportation Engineer
City of South Portland
