RE: Contained Aquatic Disposal Cell Proposal

Dear Municipal Officials:

The Bureau of Parks and Lands (Bureau), within the Maine Department of Agriculture, Conservation and Forestry, has received an application from the Cities of Portland and South Portland to dredge an area on which to place a Contained Aquatic Disposal site on submerged lands in South Portland.

Under the Bureau's standard review procedure, this correspondence is to provide the municipality with an opportunity to comment on any impacts the project may have as described in the enclosed NOTICE. Although this letter is addressed to the municipal officials, any interested party or anyone who is knowledgeable about the area is welcome to comment. If the municipality has a harbor committee, port authority, or other organization that has responsibility for reviewing coastal activities, please provide them with a copy of this NOTICE.

Please post the enclosed NOTICE in the municipal office. Comments must be received by the Bureau on or before July 6, 2020. Thank you.

Sincerely,

Karen Foust  
Submerged Lands Coordinator

Enc: Notice  
cc: Harbormaster w/ enclosure
NOTICE – June 4, 2020

Applicant: City of Portland, City of South Portland
Proposal: To dredge 376,858 cubic yards of material to create a Contained Aquatic Disposal (CAD) cell which would receive dredged material from 47 locations within Portland Harbor (separate application). The material dredged from the CAD cell area would be disposed of at the Portland Disposal Site (PDS) offshore.
Location: Portland Harbor, 500 feet west of the Coast Guard Station, City of South Portland

The Bureau of Parks and Lands (Bureau) has received an application to occupy submerged lands for the project described above. Pursuant to Title 12 M.R.S.A., Section 1801 & 1862, the Bureau serves as trustee of submerged lands for the State of Maine. Submerged lands include all land from the mean low-water mark seaward to the 3-mile territorial limit including all land below the mean low-water mark of tidal rivers upstream to the farthest natural reaches of the tides.

Before the proposal may take place, the applicant must obtain a lease or easement from the Bureau. A lease or easement may be granted for the project if it will not:

- unreasonably interfere with customary or traditional public access ways to, or public trust rights (fishing, fowling, recreation, and navigation) in, on or over the submerged lands;

- unreasonably interfere with fishing or other existing marine uses of the area;

- unreasonably diminish the availability of services and facilities necessary for commercial marine activities; and

- unreasonably interfere with ingress and egress of riparian owners.

A copy of the site plan is attached for information. Any interested party or anyone who is knowledgeable about the area is welcome to comment on possible impacts to the activities listed above. Comments must be received on or before July 6, 2020.

For more information, please contact Karen Foust, Bureau of Parks and Lands.
